### **DETAILED ACTION**

Claims 1-4, 6, 8, 10, 14, 15, 17, 18 and 24-26 are under consideration in this application.

Claims 7, 11, 19 and 21-23 are held withdrawn as being drawn to nonelected subject matter 37 CFR 1.142(b).

#### ***Election/Restrictions***

Applicant's election with traverse of Group I in the reply filed on November 22, 2006 is acknowledged. The traversal is on the ground(s) that the required restriction is merely arbitrary. This is not found persuasive because for the reasons clearly set forth in the previous Office action. Furthermore, applicants have failed to provide any cogent reasons as to why the compounds do not lack unity of invention. Applicants merely allege that the treatment of all the numerous diseases are mediated by Cox-2 is a special technical feature. The diseases listed in the specification are not known to share a common mechanism or pathway.

It is too burdensome for the examiner to search all of the previously noted searches in their respective, completely divergent, areas for the non-elected subject matter, as well, in the limited time provided to search one invention.

The requirement is still deemed sound and proper and is therefore maintained.

This application has been examined in regard to the elected compounds wherein X is oxygen or NR<sup>2</sup>, Y is CH, R<sup>1</sup>, R<sup>2</sup> and B represent non-heterocyclic containing groups, A is (optionally substituted) aryl and R<sup>3</sup>, R<sup>6</sup> -R<sup>10</sup> and n as set forth in claim 1 exclusively. Claims 10 and 25 have been examined to the extent readable on the elected method, *i.e.*, rheumatoid arthritis and osteoarthritis.

Art Unit: 1625

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be **allowable**, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. *Applicants are reminded of propriety of process of use claims in consideration of the reach-through format, which are drawn to mechanistic, receptor binding or enzymatic functionality. Reach through claims are considered lacking of descriptive and enabling support from the specification.*

**Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 14 and 15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 14 and 15 are substantial duplicates.

***Allowable Subject Matter***

Claims 14 and 15 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims and if rewritten directed solely to the elected method of treatment.

Claims 1-3 are objected to as containing nonelected subject matter. The objection may be overcome by limiting the claim to the subject matter indicated as being examinable, supra. A claim so limited would appear allowable.

Claims 4, 6, 8, 10, 17, 18 and 24-26 presented in independent form or made dependent on an allowable claim, would appear allowable, otherwise it is objected to as being dependent on a non allowed claim.
